

Title: Dalgona Coffee

Age Group: School Age

Submitted by: **Lei W. (Head Office)**

Type of Activity: Science

Materials:

- Large mixing bowl and a hand mixer
- 2 tablespoons instant coffee, 2 tablespoons white granulated sugar and 2 tablespoons very hot water
- 1/2 cup of milk and some ice cubes
- A cup
- A spoon

How to Do it:

- Have the child(ren) mix the coffee, sugar and water in the large mixing bowl.
- Have the child(ren) use the hand mixer to whisk it! It should form a stiff peak in about 2 minutes and 30-40 seconds or be whisked about 400 times.
- Have the child(ren) fill the cup with the cold milk and ice cubes and use the spoon to top it with the foamy coffee.
- Mix them well before drinking. Enjoy!

Root Skill / Extension:

This science activity can encourage children to measure weight, capacity, temperature. It can foster a positive attitude towards learning, and let the family experience a fun group activity.

You can extend the learning by having your child(ren) research other recipes they'd like to try.
Open question: "What will it happen if we only put 1 tablespoon sugar?"
