

# Title: Foam Plate Tic-Tac-Toe (2 Players)

Age Group: School Age

Submitted by: **Lei W.**

**Type of Activity: Cognitive – Rules and Games Play**

## Materials:

- 10 foam/paper plates
- Coloured masking tapes
- Marker

## How to Do it:

- Use a marker to make a large “X” on the back of five of the foam/paper plates, and a large “O” on the back of the other five plates.
- On the floor, lay down a tic-tac-toe grid using the masking tapes.
- Two players take turn putting their plates in the grid in an attempt to get 3 of their plates (either X’s or O’s) in a row.

The first one to get all three of his/her symbols in a row, whether it is diagonal, horizontal, or vertical, wins the game.

## Root Skill / Extension:

### Cognitive 4.11 Games with Rules

- Refer to continuum of Development from ELECT Document (Fish Bone Diagram)

This large floor-sized version of the classic game is a new way for your children to play, using large muscle skills they don’t use sitting at a table. They’ll learn to apply logic and form a strategy as they try to place their symbols three-in-a-row to win the game, helping to increase their concentration level. This game also helps develop coordination, fine motor skills and visual skills in children.
