

Title: Paper Origami – Make a Cootie Catcher/Fortune Teller

Age Group: School Age

Submitted by: Cherrie L

Type of Activity: Paper craft

Materials:

- Paper
- markers

How to Do it:

First, get a piece of paper. If you start with a rectangular paper, you will need to make a square by folding one corner over to the edge and cut off the extra flap.

Unfold it and you have a square.

Fold the corners, and crease.

Unfold it, and fold each corner point to the centre of the creases.

Now, flip it over, and fold all four corners point into the centre again.

Now, write the numbers 1-8 on each of the flaps.

Lift up the flaps and write fortunes, tasks or any exercise moves that you can do at home in each triangle. Be creative!!

Flip it over and draw any pictures or colors or names on each little square.

Then, put your two thumbs and two pointer fingers into each pockets, pinch pointer and thumb together and push them to the centre.

Now, you could start playing with your family!

Root Skill / Extension:

Paper origami could help to develop Eye-hand coordination skill, sequencing skill, spatial skill, memory, and fine motor skills. It also helps to practice attention and concentration.

Extension: Children could make other origami projects and children could color and decorate the paper that they want to use.
